

SETTING THE STANDARD

Specialist Refractory Services Limited

SRS continue to strive for excellence and innovation in their products for the jewellery manufacturing industry worldwide. Through the extensive research and development efforts SRS ensure that they remain at the forefront of technology giving improved product performance for casters.

GOODWIN 316 SS JEWELLERY CASTING ALLOY

Goodwin 316 SS Jewellery Casting Alloy is a new specially formulated Stainless Steel designed to produce top quality jewellery castings.

Goodwin 316 SS Jewellery Casting Alloy due to its unique qualities ensures complete fill of the most intrinsic jewellery designs requiring minimal clean off due to low level oxide residue. Goodwin 316 SS Jewellery Casting Alloy performs at its best with the use of STEELCAST.

SRS's commitment to improving the quality and range of products presents this new product to ensure jewellery casters have the best products at their disposal to ensure excellent jewellery casting and an effective and efficient casting process.
