

## INVESTMENT POWDERS Eurovest

### Investment powder for jewellery

EUROVEST has been available for many years from SRS - tried and tested by jewellery manufacturers worldwide. It is designed primarily for non-precious metal casting in brass, silver and gold up to 14K. EUROVEST is an economy investment powder for large scale commercial casters giving excellent value for money; EUROVEST offers the following benefits.

### EUROVEST offers the following benefits to the art foundries:

- Quality controlled raw materials graded especially for lost wax casting
- EUROVEST gives good thermal shock resistance during burnout and casting
- Designed to be user friendly and able to perform in a wide set of parameters
- Suitable for brass, silver and gold up to 14K
- Includes all wetting and debubbling agents - no need to add before mixing
- Smooth creamy consistency during mixing and pouring

For full instruction on how to use EUROVEST please refer to the mixing and burnout instructions found in every bag or drum
