

INVESTMENT POWDERS Global

Investment powder for jewellery casting

SRS GLOBAL is in the middle of the SRS range of investment powders for jewellery casting.

SRS GLOBAL is used for high quality gold casting in exacting circumstances and is ideal in situations where top quality is required at a more economical price.

GLOBAL fits between EUROVEST and CLASSIC in the SRS product range - in terms of price close to EUROVEST but very close to CLASSIC in terms of quality and performance.

SRS GLOBAL can be used on all metals and in particular on gold up to 18Ct. It will give defect free castings and a superior surface finish every time. GLOBAL is designed to offer flexibility in use no matter what the situation and will give perfect results time after time. GLOBAL breaks away and cleans easily after casting.

SRS GLOBAL is manufactured under ISO9001 quality system at the SRS factory in UK. It should be used in the same way as CLASSIC and EUROVEST i.e. at 100/38. The mixing, burnout and casting schedules are exactly the same

For full instruction on how to use GLOBAL please refer to the mixing and burnout instructions found in every bag or drum
